2

FIG. 2 is a schematic diagram of a device 200, showing a top view of a substrate 20 with a central region 21 and a peripheral region 22. The central region 21 is divided into two sub-regions 211 and 212. The peripheral region 22 is divided into two sub-regions 221 and 222. The device 200 includes a plurality of elements 24 and 23, which are arranged in a grid pattern. The elements 24 are located in the central region 21, and the elements 23 are located in the peripheral region 22. The elements 24 are connected to the elements 23 by a network of lines. The device 200 is shown in a perspective view, with the substrate 20 and the elements 24 and 23 being clearly visible. The central region 21 and the peripheral region 22 are also clearly visible. The sub-regions 211 and 212, and 221 and 222 are also clearly visible. The elements 24 and 23 are arranged in a grid pattern, and the lines connecting them form a network. The device 200 is shown in a perspective view, and the substrate 20, elements 24 and 23, central region 21, peripheral region 22, sub-regions 211 and 212, and 221 and 222 are all clearly visible.
